

# Welcome to the wave

Realwave provides advanced real-time Cloud Video Business Intelligence

# What is Realwave?

The Realwave platform is a cloud based application built to improve team execution leveraging Video IoT for multi-site operators.

## Loss Prevention

POS Integration, remote video auditing, suspicious transactions, enterprise-wide exception based reports, KPI dashboard and food cost monitoring.

## Marketing

Customer tracking both in the store and through social media. Know when your customer visit, how long they stay, when they convert, what they buy and how often they repeat. Know total number of unique vs. returning customers.

## Security

Alarm monitoring, intrusion detection, panic buttons, cash clips, enterprise wide surveillance, smart safe integration and the ability to forward video to the police.

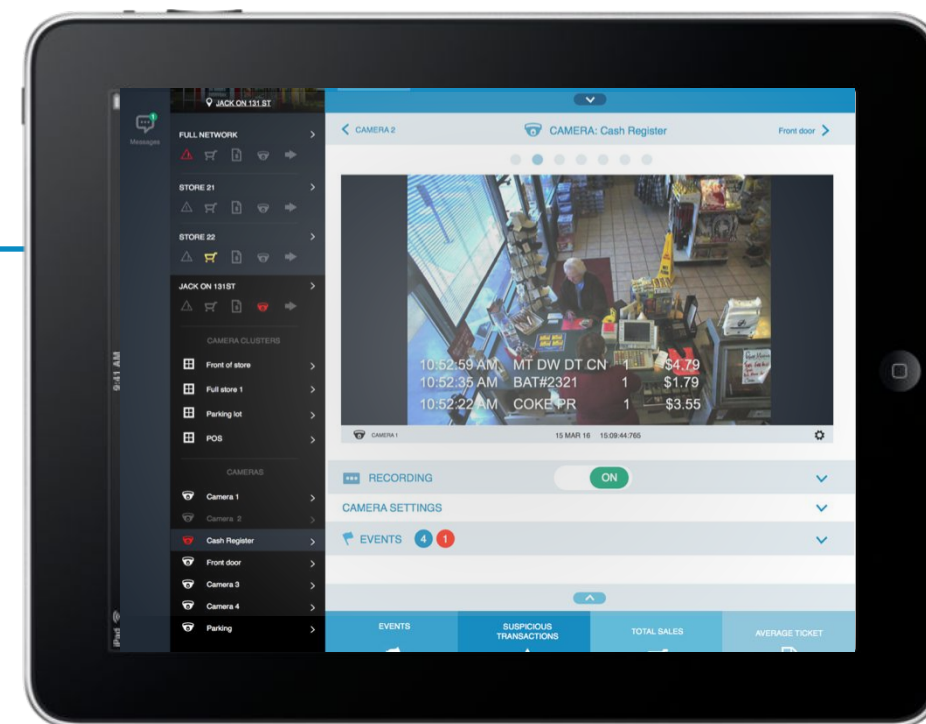

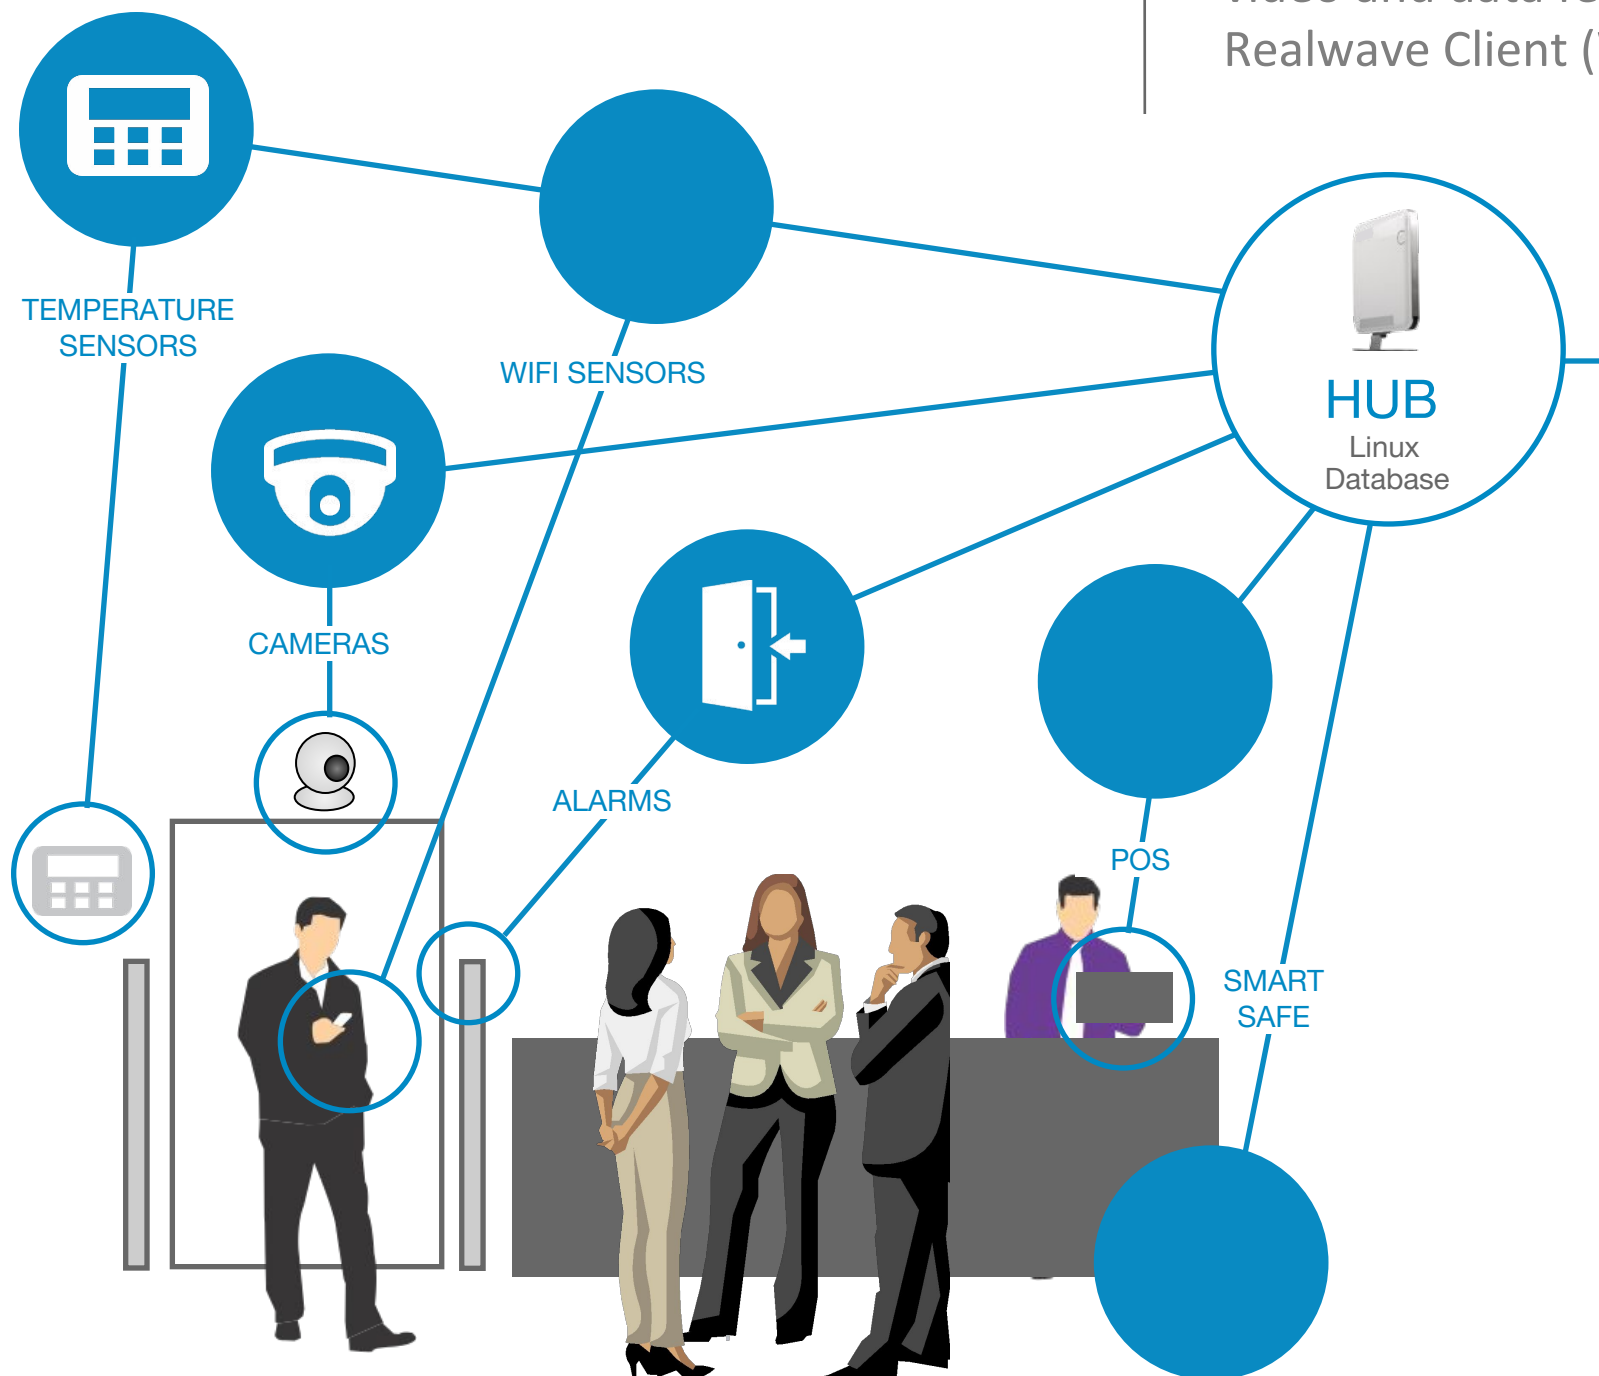

## Operations

Time to service tracking, virtual shopper services, operational audits, open/close compliance reports, temperature sensor integration, upselling analysis, real-time sales updates with comparison data, top selling item analysis.

# The Platform

Realwave's cloud-based platform comprises components: The RealHUB (site base hub collecting video and data feeds), The Realwave Cloud, and the Realwave Client (Web/Mobile) .

# The Platform

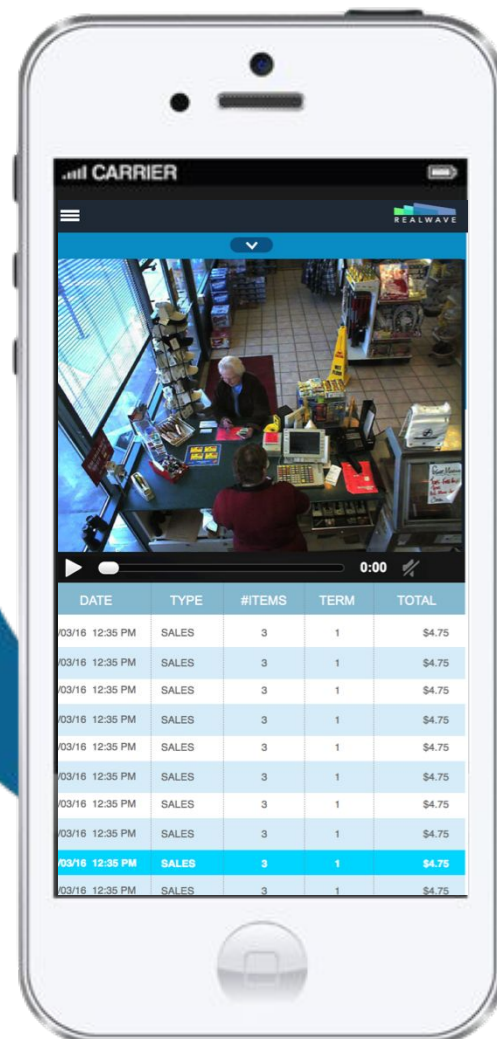

RealWave is an open platform providing capability to all IP camera models, POS systems, mobile device and other data sources.
